DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
4. Group I, claim(s) 1-9 and 11-13, drawn to a method for regenerating *Acacia mangium*.

Group II, claim(s) 10 and 37-40, drawn to any method of making a transgenic *Acacia mangium* plant including electroporation or biolistic methods.

Group III, claims 14-24, and 28-36, drawn to a method of transforming *Acacia mangium* using *Agrobacterium tumefaciens*.

Group IV, claims 25-27, drawn to a method for promoting root formation in any plant species from adventitious buds that have been transformed by any method.

Group V, claims 41-42, drawn to a transgenic *Acacia mangium* cell or plant transformed by any method.

5. The claims are not linked by a single special technical feature because the invention of Group I does not constitute an advance over the prior art. Group I is taught by Galiana et al (1991, Plant and Soil 135(2):151-160) who teach a method of regenerating *Acacia mangium* using tissue culture. Hence, there is no special technical feature that links the method of regenerating *Acacia magnium* of Group I to the method of making a transgenic *Acacia mangium*

Art Unit: 1638

of Group II or to the method of transforming *Acacia mangium* using *Agrobacterium* of Group III or to the method of promoting root formation from adventitious buds that have been transformed by a method of Group IV or to the transgenic *Acacia mangium* cell or plant of Group V.

Furthermore, the methods of Groups I-IV are distinct from each other because the starting material, method steps and end products are distinct one from the other. Finally, the product of Group V is distinct because it requires transformation steps not required by the processes of Groups I and IV.

6. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the literature searches required for each of the Groups are not required for another of the Groups, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stuart Baum whose telephone number is (703) 305-6997. The examiner can normally be reached on Monday-Friday 8:30AM – 5:00PM.
